Contents

Aescht E, Foissner W: Effects of mineral and organic fertilizers on the microfauna in a high-altitude reafforestation trial 17
Ampornpan L → Dhillion SS
Antonenko GI → Krivolutsky DA
Artiola JF, Pepper IL: Denitrification activity in the root zone of a sludge-amended desert soil 200
Asharf M → Azam F
Ayama N → Okereke GU
Azam F, Asharf M, Lodhi A, Sajjad MI: Fate and interaction with native soil N of ammonium N applied to wetland rice (*Oryza sativa* L.) grown under saline and non-saline conditions 102
Azcón R, Barea JM: The effect of vesicular-arbuscular mycorrhizae in decreasing Ca acquisition by alfalfa plants in calcareous soils 155

Bagyaraj DJ → Secilia J
Balzer FM → Beyer L
Balzer-Graf UR → Beyer L
Barea JM → Azcón R
Benckiser G → Rajbanshi SS
Bernal MP, Kirchmann H: Carbon and nitrogen mineralization and ammonia volatilization from fresh, aerobically and anaerobically treated pig manure during incubation with soil 135
Beyer L, Wachendorf C, Balzer FM, Balzer-Graf UR: The use of biological methods to determine the microbiological activity of soils under cultivation 242
Brodrick SJ, Sakala MK, Giller KE: Molybdenum reserves of seed, and growth and N_2 fixation by *Phaseolus vulgaris* L. 39
Buchanan M, King LD: Seasonal fluctuations in soil microbial biomass carbon, phosphorus, and activity in no-till and reduced-chemical-input maize agroecosystems 211
Buser H-R → Frey B

Ceccanti B → García C
Ceccanti B → Gil-Sotres F
Chalamet A → Lescure C
Chalk PM → Smith CJ
Chanway CP → O'Neill GA
Christiansen-Weniger C: N_2-fixation by ammonium-excreting *Azospirillum brasilense* in auxine-induced root tumours of wheat (*Triticum aestivum* L.) 165
Churin J-L → Garbaye J
Ciardi C → Gil-Sotres F
Costa F → García C
Cresser MS → Kemp JS

Danso SKA → Kumarasinghe KS
Dell'Amico C → García C
Dhillion SS, Ampornpan L: The influence of inorganic nutrient fertilization on the growth, nutrient composition and vesicular-arbuscular mycorrhizal colonization of pretransplant rice (*Oryza sativa* L.) plants 85
Dhillion SS: Dual inoculation of pretransplant stage *Oryza sativa* L. plants with indigenous vesicular-arbuscular mycorrhizal fungi and fluorescent *Pseudomonas* spp. 147
Diez JA, Polo A, Guerrero F: Effect of sewage sludge on nitrogen availability in peat 248
Duponnois R → Garbaye J

Einbork M → Haimi J

Fenn LB, Tipton JL, Tatum G: Urease activity in two cultivated and non-cultivated arid soils 152
Foissner W → Aescht E
Frankenberger WT → Martens DA
Frey B, Buser H-R, Schüepp H: Identification of ergosterol in vesicular-arbuscular mycorrhizae 229

Gammack SM → Kemp JS
Garbaye J, Churin J-L, Duponnois R: Effects of substrate sterilization, fungicide treatment, and mycorrhization helper bacteria on ectomycorrhizal formation of pedunculate oak (*Quercus robur*) inoculated with *Laccaria laccata* in two peat bare-root nurseries 55
García C, Hernández T, Costa F, Ceccanti B, Dell'Amico C: Characterization of the organic fraction of an uncomposted and composted sewage sludge by isoelectric focusing and gel filtration 112
Gil-Sotres F, Trasar-Cepeda MC, Ciardi C, Ceccanti B, Leirós MC: Biochemical characterization of biological activity in very young mine soils 25
Giller KE → Brodrick SJ
Gonzalez-Lopez J, Martinez-Toledo MV, Salmeron V: Effect of the insecticide methidathion on agricultural soil microflora 173
Guerrero F → Diez JA
Guiraud G, Marol C: Influence of temperature on mineralization kinetics with a nitrification inhibitor (mixture of dicyandiamide and ammonium thiosulfate) 1

Haimi J, Einbork M: Effects of endogeic earthworms on soil processes and plant growth in coniferous forest soil 6
Hamilton SD → Smith CJ
Hernández T → García C
Hopmans P → Smith CJ

Izaurralde RC, McGill WB, Juma NG: Nitrogen fixation efficiency, interspecies N transfer, and root growth in barley-field pea intercrop on a Black Chernozemic soil 11

Johri BN → Sharma AK
Juma NG → Izaurralde RC

Kemp JS, Paterson E, Gammack SM, Cresser MS, Killham K: Leaching of genetically modified *Pseudomonas fluorescens* through organic soils: influence of temperature, soil pH, and roots 218
Killham K → Kemp JS
King LD → Buchanan M
Kirchmann H → Bernal MP
Korner J, Laczkó E: A new method for assessing soil microorganism diversity and evidence of vitamin deficiency in low diversity communities 58
Kozhevnikova TL → Krivolutsky DA
Krivolutsky DA, Kozhevnikova TL, Martjushov VZ, Antonenko GI: Effects of transuranic (^{239}Pu, ^{239}Np, ^{241}Am) elements on soils fauna 79
Kumarasinghe KS, Danso SKA, Zapata F: Field evaluation of N_2 fixation and N partitioning in climbing bean (*Phaseolus vulgaris* L.) using ^{15}N 142

Laczkó E → Korner J
Ladha JK → Rarivoson G
Leinweber P, Reuter G: The influence of different fertilization practices on concentrations of organic carbon and total nitrogen in particle-size fractions during 34 years of a soil formation experiment in loamy marl 119
Leirós MC → Gil-Sotres F
Lensi R → Lescure C
Lescure C, Menendez L, Lensi R, Chalamet A, Pidello A: Effect of addition of various carbon substrates on denitrification in a vertic Mollisol 125
Lodhi A → Azam F
Lützow M von, Zelles L, Scheunert I, Ottow JCG: Seasonal effects of liming, irrigation, and acid precipitation on microbial biomass N in a spruce (*Picea abies* L.) forest soil 130
Luotonen H → Ohtonen R

Markkola AM → Ohtonen R
Marol C → Guiraud G
Martens DA, Frankenberger WT: Decomposition of bacterial polymers in soil and their influence on soils structure 65
Martinez-Toledo MV → Gonzalez-Lopez J
Martjushov VZ → Krivolutsky DA
McGill WB → Izaurralde RC
Menendez L → Lescure C

Narain Rai JP: Effects of long-term 2,4-D application on microbial populations and biochemical processes in cultivated soil 187
Nordgren A: A method for determining microbially available N and P in an organic soil 195

Ohtonen A → Ohtonen R
Ohtonen R, Ohtonen A, Luotonen H, Markkola AM: Enchytraeid and nematode numbers in urban, polluted Scots pine (*Pinus sylvestris*) stands in relation to other soil biological parameters 50

Okereke GU, Ayama N: Sources of nitrogen and yield advantages for monocropping and mixed cropping with cowpeas (*Vigna unguiculata* L.) and upland rice (*Oryza sativa* L.) 225
O'Neill GA, Radley RA, Chanway CP: Variable effects of emergence-promoting rhizobacteria on conifer seedling growth under nursery conditions 45
Ottow JCG → Lützow M von
Ottow JCG → Rajbanshi SS

Paterson E → Kemp JS
Pepper IL → Artiola JF
Pidello A → Lescure C
Polo A → Diez JA
Praveen-Kumar → Tarafdar JC

Radley RA → O'Neill GA
Raistrick N → Whitehead DC
Rajbanshi SS, Benckiser G, Ottoew JCG: Effects of concentration, incubation temperature, and repeated applications on degradation kinetics of dicyandiamide (DCD) in model experiments with a silt loam soil 61
Rao AV → Tarafdar JC
Rarivoson G, Ladha JK: Isotope ^{15}N enrichment of soil-ammonium N as a reference to estimate N_2 fixation by stem and root-inoculated *S. rostrata* 74
Rathore VS → Sharma AK
Reber HH: Simultaneous estimates of the diversity and the degradative capability of heavy-metal-affected soil bacterial communities 181
Reuter G → Leinweber P
Rewari RB → Saxena AK

Sajjad MI → Azam F
Sakala MK → Brodrick SJ
Salmeron V → Gonzalez-Lopez J
Saxena AK, Rewari RB: Differential responses of chickpea (*Cicer arietinum* L.) – *Rhizobium* combinations to saline soil conditions 31
Scheu S: Decomposition of lignin in soil microcompartments: a methodical study with three different C-14-labelled lignin substrates 160
Scheunert I → Lützow M von
Schüepp H → Frey B
Secilia J, Bagyaraj DJ: Selection of efficient vesicular-arbuscular mycorrhizal fungi for wetland rice (*Oryza sativa* L.) 108
Sharma AK, Srivastava PC, Johri BN, Rathore VS: Kinetics of zinc uptake by mycorrhizal (VAM) and non-mycorrhizal corn (*Zea mays* L.) roots 206
Smith CJ, Chalk PM, Hamilton SD, Hopmans P: Estimating N_2 fixation by field-grown lupins (*Lupinus angustifolius* L.) using soil and plant ^{15}N enrichment 235
Srivastava PC → Sharma AK
Srivastava SC: Influence of soil properties on microbial C, N and P in dry tropical ecosystems 176

Tarafdar JC, Rao AV, Praveen-Kumar: Effects of different phosphatase-producing fungi on growth and nutrition of mung beans [*Vigna radiata* (L.) Wilczek] in an arid soil 35
Tatum G → Fenn LB
Tipton JL → Fenn LB
Trasar-Cepeda MC → Gil-Sotres F

Wachendorf C → Beyer L
Wheatley RE → Williams BL
Whitehead DC, Raistrick N: Effects of plant material on ammonia volatilization from simulated livestock urine applied to soil 92
Williams BL, Wheatley RE: Mineral nitrogen dynamics in poorly drained blanket peat 96

Zapata F → Kumarasinge KS
Zelles L → Lützow M von
Zimmerman WJ: Ammonium uptake and excretion in *Azolla-Anabaena* symbiosis 192
